

Embedded France welcomes major industrial companies, emerging startups, competitiveness clusters, universities and engineering schools acting in the field of Embedded Software and Systems

<https://www.embedded-france.org/>

Meet and face students to demystify !!

So did we at ESIEA, EISTI, ... more to come !

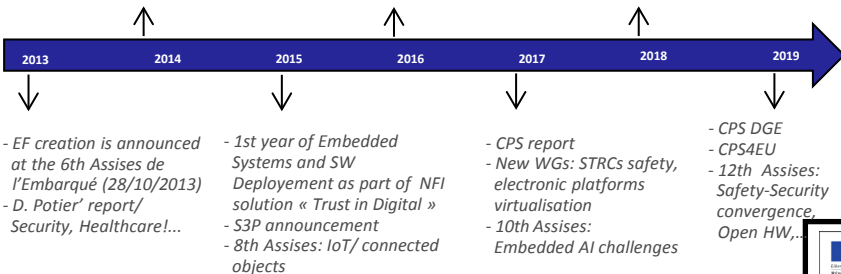

# Embedded France is the association of French players in Embedded Software and System

## Always forward Looking

- Initial working groups
- Validation of NFI by Gvt – EF in charge of Embedded System plan - 7th Assises: Focus NFI

- EF positioning at EU level
- S3P Alliance kick off
- 9th Assises: S3P/ Multi physics simulation/ IoT

- S3P closing
- CSF (may 2018)
- Comm. plan
- Increase relationship with HealthCare and Academics
- 11th Assises: CPS

## Our missions

- Federate sectors
- Break down sectorial silos
- Develop international cooperation
- Ease hiring and training
- Communicate

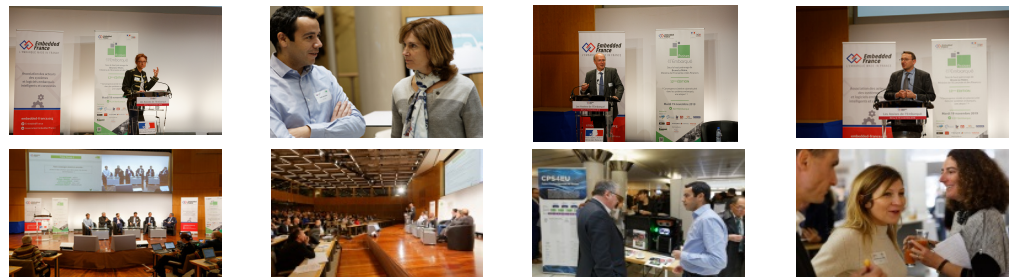

## Working Groups

- Software for Smart and Connected objects
- Regulation and standards – dependability and certification
- Embedded Artificial Intelligence
- Manycore
- Virtualization of digital platforms
- Engineering of safe and critical Embedded Systems

## Les Assises de l'Embarqué

Organized in partnership with the General Directorate of Enterprises of the Ministry of Economy and Finance (DGE), the annual event, "Assises de l'Embarqué", is held every year in November at the French Ministry of Economy, in Bercy. During a whole day, it combines round tables of experts, keynote speakers, pitches of companies nominated to "Trophées de l'Embarqué" and awards the "Trophées".

## Les Trophées de l'Embarqué

These awards make it possible to distinguish companies and startups carrying particularly innovative projects in the field of embedded technologies.
